

Athletic Lockers

Athletic Lockers

Athletic Lockers are constructed to withstand the use and abuse of a sports locker room.

Selected components are vented to provide maximum air flow while maintaining maximum durability by using variable gauges of steel to suit customer requirements.

As with all lockers, these lockers operate quietly due to no moving parts and built in door silencers.

Apex

Summit

Pinnacle

Apex Locker

Standard to Medium Duty

Frame: 16Ga

Doors: 20 or 16Ga

Body: 24Ga

Ventilation – The door has 3/4" (19 mm) diameter round openings spaced at 1-1/8" (29 mm) centres in the outer and inner panels of the door. As an option, body components are available with 3/8" (9.5 mm) diameter opening for improved airflow.

Summit Locker

Medium Duty to Heavy Duty

Frame: 16Ga

Doors: 20 or 16Ga

Body: 24 to 16Ga

Ventilation – The door has 3/4" (19 mm) square openings spaced at 1-1/16" (27 mm) diagonally in the outer and inner panels of the door. The shelf, bottom and locker sides are perforated with 3/8" (9.5 mm) diameter holes.

Pinnacle Locker

Ultra Heavy Duty

Frame: 16Ga

Doors: 16Ga

Body: 16Ga

Ventilation – The door has 3/8" (9.5 mm) x 1" (25 mm) obround openings spaced at 3/4" (19 mm) in the outer and inner panels of the door. The body components have 3/4" (19 mm) square openings spaced at 1-1/16" (27 mm) diagonally.
