

E-Z-Rect High Density Mobile Shelving

E-Z-Rect Mobile System Benefits

E-Z-Rect Mobile storage systems maximize storage space by increasing density without affecting accessibility. High density mobile systems are suitable for all space limited environments including retail, office, professional, warehouse, and healthcare environments. E-Z-Rect Mobile is compatible with both Type 1 and Trimline.

- Increase storage space by a minimum of 38% up to 100%
- Reduce storage foot print
- No sacrifice in accessibility compared to static shelving
- Increase storage space in your location
- Lower storage space lease costs

Maximize Space & Minimize Costs

A high density, mobile shelving solution from E-Z-Rect is a simple and cost effective solution to expanding storage needs without expanding the foot print. An intelligent and efficient system will realize a minimum of 38% increase in usable storage, while most applications realize 50%. Densified storage accommodates future growth and improves ergonomics without affecting accessibility and function.

Mobile Shelving Features

- Patented floating track that eliminates risk of derailment
- Compatible with Trim-line or Type 1 shelving
- Seismic location approved
- Available Mechanical Assist for weightless operation
